

1. **Research Topic:** Economic Deprivation of Transgender Community in Faisalabad city.
2. **Introduction:** Economic independence is key to success of any society. A society consists of different types of people with various characteristics. The best way to develop a society is to make it economically independent. This is possible only when all people can be accommodated according to their skills and need. So, **the aim** of the research is to find the problems of an important unit of society the transgender.
3. **Objective of the Study:** To understand the problems of transgender to make them productive citizens and to reduce the dependency rate of the society.
4. **Outcome of the research:** The research group published the research work so the policy makers can use it for the development of transgender.
