

Molecular Biochemistry Research Group

Dr.Sumera Shaheen is group leader of Molecular Biochemistry group in the Department of Biochemistry, Govt. College Women University, Faisalabad, Pakistan. Focus of research of this group is on; DNA,RNA and Protein work with emphasis on Gene Expression Regulation, Genetic Engineering, Cell Lines. This research group is interested to work on molecular basis of disease including, Breast Cancer, Polycystic Ovarian Syndrome (PCOS).

Currently, Dr.Sumera Shaheen is working research Project: **Development of DNA Based Markers for Identification and Improving Food safety of Meat and Meat products. Project is funded by USAID and PARB,She has has established Molecular Research lab in the dept with Research Project funding.**
